

HANNspree Tablets Gain Accreditation by NetSupport

NetSupport School Student app validation boosts HANNspree's presence in the education channel

The increasing popularity of tablet PCs in schools, thanks to the introduction of specialised software solutions and the use of applications such as Mine Craft for educational purposes, is seeing the HANNspree brand become a leading global provider of tablet PC solutions to the education channel. The HANNspree HANNSpad tablet PC which is already regularly selected for large tenders, thanks to the winning combination of features, price and warranty it offers, is consistently proving ideal to meet this channel's specific demands. Now HANNspree is pleased to announce that it has gained accreditation from market leading educational software developer NetSupport, to enable the HANNSpad tablet to host its NetSupport School Student app for Android.

Sales Director of Hannspree Europe, Gregor Perng comments:

"HANNspree tablet PCs are already setting the standard in the education channel. Since company focus was put onto this market in Q4 2013 HANNspree has attracted the attention of some very important players including the Italian Ministry of Education which references the HANNSpad solution as its first choice in an official tender. Receiving homologation for NetSupport's highly popular classroom management solution will further boost HANNspree's presence in the education channel by providing future potential business, and help build upon our success thus far in this challenging market."

The alliance with NetSupport and its solution will see HANNspree enlisted as an education solution candidate and the HANNSpad promoted as a credited device which will champion the HANNspree brand to emerging business opportunities. The partnership with NetSupport, with its 25-year development pedigree and a worldwide installation base of 14 million systems, will undoubtedly have the potential to elevate the HANNspree brand to the highest level in the education sector.

NetSupport's accreditation process primarily focuses on validating its Android Student app on devices to allow remote screen monitoring; a key requirement of classroom management software that allows teachers to orchestrate computer-led instruction. Key instructional tools available for teachers to use in the Android version include: the ability to conduct class surveys and carry out student and peer assessment with a unique, gamified Q+A module; the quick transfer of files from the teacher to the students' devices; and an informative student toolbar to display lesson objectives and expected outcomes. These tools are provided in addition to NetSupport School's core chat, message and request help capabilities, the ability for teachers to broadcast their screen directly to students' tablets and to lock tablet screens to gain attention.

NetSupport's Managing Director Al Kingsley comments:

"The increased use of mobile technology in the classroom sets the challenge for classroom management vendors to ensure that relevant teaching tools are available across a range of devices and we have been quick to ensure NetSupport School is future-proofed to operate within any environment. In particular, BYOD (Bring Your Own Device) and mobile classroom computing

HANNspree

have brought focus to the need for classroom management software to work on Android devices and we have been working with tablet manufacturers to validate our app in order to provide an accredited list of devices for schools. We are extremely pleased to be working with HANNspree and to have passed their first device which we understand to be an extremely popular choice for education establishments.”

For further information about NetSupport School and to download a free trial of the teacher’s desktop version, visit www.netsupportschool.com The NetSupport School Student app for Android is available for download from the Google Play store.

This news, coupled with the recent launch of new HANNspad tablet PC models, sees HANNspree’s presence in the market at an all-time high and HANNspree has every confidence that it will continue to establish as a leading tablet PC manufacturer.

About Hannspree

HANNspree is a global consumer electronics manufacturer specialising in audio visual technology. It is part of the HannStar Display Corporation headquartered in Taipei, Taiwan, one of the largest glass panel manufacturers in the world consequently both the HANNspree and HannsG brands benefit from a rich heritage and world-class technological prowess in AV technology.

HannStar created the HANNspree brand in 2006 to deliver a new, exciting portfolio of consumer electronic products that stood out from the crowd which successfully managed to shake up an industry associated with mass-production and uniform product design to lead a design-centric revolution. This strategy put the HANNspree brand on the map and allowed the company to successfully transfer its expertise into the design of mass consumer electronics in line with market demand.

HANNspree now offers a portfolio of large screen Tablet PCs and Wearables boasting advanced proprietary touch screen technologies by HannsTouch – one of the largest touch screen manufacturers in the world, and has recently added a range of micro computing devices.

HANNspree is the Official Display Partner of UK Premiership football team, Watford FC.

About NetSupport

Headquartered in the UK, NetSupport has been a market-leading developer of corporate and education-focused software for more than 26 years.

Its flagship solutions are NetSupport Manager (remote control and PC management), and NetSupport School (classroom management and instruction). The company also specialises in IT Asset Management, ITIL Service Desk, Desktop Security and Desktop Alerting software.

NetSupport was named a finalist in the Education Business of the Year category at the 2015 Education Investor Awards – and its NetSupport School solution was chosen as a finalist in the ICT Tools for Learning, Teaching and Assessment category at the prestigious Bett Awards 2016.
