

Vending Machines even now smarter with HANNspree Displays, Touch Monitors and Android Box solutions

HANNspree
Official Technological Partner

e FAS
we are connected

[Hannspree](#), one of the leading manufacturers specialised in Display visual technologies and [FAS International](#), one of the most important European Vending Machines producers leader in the Snack & Food distribution, have signed a technological partnership.

Based on this agreement, Hannspree has been appointed as the FAS's **“Official Display Technology Partner”**, and will provide high-end touch display products to be integrated into the new FAS vending machines. This will help to boost the vending machine efficiency in order to provide consumers with more details about the products distributed in a better and smarter way.

“Touchscreens offer an ideal platform for product presentations and further advertising options.”

Venditalia 2016 has been a unique occasion for customers and for the whole market to appreciate the newest innovative product range from FAS that will be in production starting from Autumn 2016 and that will see HANNspree providing their 7”, 13.3” and 21.5” Touch displays helping to create a simpler configuration and allow a smoother interaction between end-users and the vending machines.

HANNspree
Official display technology partner

Vending machines are now part of our daily lives, they welcome us everywhere: office, school, canteens and public areas. They are also used in traditional shops as touch-point info.

According to a recent survey made by Accenture and commissioned by Confida (Italian Association of vending machines), 30 million of Italians are using vending machines and, in the future, the product diversification and service improvement for customer's satisfaction will be even more necessary.

"We are very pleased to have signed this agreement with FAS International. The partnership will give a great contribution to the development of new solutions with touch displays, tailored to the specific needs of the vending sector, "- has declared **Simone Renso, Hannspree European Product & Marketing Manager**. "This new partnership shows Hannspree's commitment to use its production capability in implementing and supporting customers with "tailor-made" customised solutions with dedicated display products"

"We are engaged in a technological renewal process applied to our entire range of Vending Machines," has said **Ivo Pancheri, Product Manager of FAS International S.p.A.** "The agreement with Hannspree, as a technology partner and representative for the European market, gives us the reliability and the service necessary to support the development of the company even further. »

Hannspre 13.3" panel with IPS display is integrated in hot drink machines: [FAS 300T & FAS 500T](#) while [FASTER TMT](#), machine range is dedicated to the selling of bigger size products.

[TRITECH TOUCH](#) touch compactor and trituration machines are with 7" IPS display and glass TP type.

All these solutions have been carefully customized in order to fulfil the specific needs of the vending sector: hard glass protection, Android SO, no battery, improved LED backlight for a longer panel lifetime, USB Hub Port and external connector in order to control and switch on the tablet allowing easy reset and remote configuration.

The automatic [@DINING-Mensa](#), is addressed for meal supply, the most complete solution for canteens, and it is equipped with the latest touch monitor 21.5" by HANNspree.

The new FAS product range of vending machines will enter in production in Autumn 2016 and it has already been previewed to the market at Venditalia Fair, 4-7 May 2016, Milan, Italy.
